

SELECTSET
AVANTRA
Imagewriter Family

44

**Large format
imagesetting solutions**

SelectSet Avantra 44 is an industry-leading, large-format PostScript imagesetter family that gives prepress and printing professionals the quality, reliability, and capabilities they need. Agfa recognizes that prepress and printing operations have different needs and budgets, so there are three models to choose from, offering different levels of quality. Each Avantra 44 imagesetter offers a generous 36x44.5" (914 x 1130mm) format that matches most large-format presses. And all are extremely easy to operate, with a user-friendly touch-screen control panel and an extremely ergonomic design.

AGFA 
The complete picture.

Meet the SelectSet Avantra 44 family

The award-winning SelectSet Avantra 44 is now available in three models — the high-performance Avantra 44XT, the high-quality Avantra 44S, and the high-value Avantra 44E.

Accuracy starts with SelectSet Avantra's internal drum, where precision engineering and flawless finishing keep the media lying perfectly flat, ensuring consistent media exposure across the entire image area.

With the SelectSet Avantra 44 family, there is a model that meets your quality and throughput needs today—and in the future. Plus, only Agfa offers a single point of contact for all key prepress elements, including imagesetters, RIPs, screening, media, and processing. And Agfa's state-of-the-art service and responsive support ensure great results.

All SelectSet Avantra 44 models include the features that have made the SelectSet Avantra family the world's leading family of internal drum imagesetters: **IntelliTrack™** Agfa's patented transport system, ensures precise motion and consistent, artifact-free output; Agfa **OptiSpot™** technology adjusts the spot size to eliminate dot gain, even at the highest resolutions; **OptiFocus™** automatically adjusts the system to accommodate different media thicknesses; **FlexMedia™** lets you use any width media, eliminating waste; to facilitate media handling, SelectSet Avantra 44 imagesetters feature **EasyLoad**, a hydraulic loading system that makes it easy to load input cassettes. All SelectSet Avantra 44 imagesetters integrate seamlessly with an optional SelectSet Avantra OLP on-line processor.

Supporting the move to an all-digital workflow

Each member of the SelectSet Avantra 44 family can handle a range of media thicknesses — including 4 mil, 8 mil, and 12 mil — allowing output of both film and Setprint polyester plate material. So any model can double as a platesetter (or duosetter) in a turnkey SelectPlate polyester platesetting configuration. An Avantra 44 imagesetter can expose Setprint polyester plates at resolutions up to 150 lines per inch for short-run spot color and black-and-white applications. And for longer runs, it can output film at higher line screens. A Setprint configuration offers a low-risk, flexible way to begin to benefit from streamlined computer-to-plate output, while putting an all-digital workflow in place.

Options that fit your needs and match your budget

You can choose from three SelectSet Avantra 44 models — the high-performance Avantra 44XT, the high-quality Avantra 44S, and the high-value Avantra 44E. All offer a set of features designed to meet specific resolution and throughput needs, while emphasizing the quality, speed, and other innovations that are the hallmarks of the SelectSet Avantra family.

Printing Press	Plate Format (mm)	Plate Format (inch)
Heidelberg Speedmaster 102	770 x 1030	30.3 x 40.6
MAN Roland 600/700	784 x 1030	30.9 x 40.6
Komori Lithrone 40	800 x 1030	31.5 x 40.6
Komori Lithrone 44	902 x 1130	33.5 x 44.5
Agfa SelectSet Avantra 44	914 x 1130	36 x 44.5

SelectSet Avantra 44 models lets you output eight imposed pages with plenty of room for trimming and finishing. Its generous 44.5" width provides a wide range of options for final gathering, folding, and binding.

	Avantra 44E	Avantra 44S	Avantra 44XT
Imaging area	35.7 x 44.5" (906 x 1130 mm)	35.7 x 44.5" (906 x 1130 mm)	35.7 x 44.5" (906 x 1130 mm)
Resolution	1200, 1800, and 2400 dpi	1200, 1800, 2400, and 3600 dpi	900, 1200, 1800, and 2400 dpi
Spot sizes	20 μ , 15 μ	20 μ , 15 μ , 10 μ , 7.5 μ	25 μ , 20 μ , 15 μ
Imaging speed	742 sq."/min.(4787 cm ² /min.) at 1200 dpi	742 sq."/min.(4787 cm ² /min.) at 1200 dpi	1113 sq."/min.(7181 cm ² /min.) at 1200 dpi
Maximum line screen	200 lpi (78 lines/cm)	425 lpi (167 lines/cm)	200 lpi (78 lines/cm)

SelectSet Avantra 44XT

The high-performance leader for fast throughput

Avantra 44XT is designed specifically for customers who need fast throughput for books and other long page-count documents. Fueled by a 30,000 rpm spin motor, the SelectSet Avantra XT can output 21 full flats per hour at 1200 dpi—50 percent faster than the Avantra 44S. Avantra 44XT lets you output standard-resolution jobs quickly. And thanks to the special Avantra automation features, these jobs are completed without delays or interruptions in the process.

Avantra 44XT also features a high-performance media handling system to support the high-throughput capabilities of the imaging engine. With its high-speed, 8-up imaging system and high-performance automated media handling—Avantra 44XT is perfect for a wide range of production-oriented applications.

SelectSet Avantra 44S

The high-quality, large-format imagesetter solution

SelectSet Avantra 44S—the flagship imagesetter of the SelectSet Avantra line—provides the highest resolution available in an 8-up, large-format imagesetter—along with all the quality and performance features of the Avantra product line. SelectSet Avantra 44S is the right choice for imaging jobs such as magazines, posters, brochures, ads, catalogs, and other applications that require high-quality output.

SelectSet Avantra 44S features a high-speed, 20,000 rpm spin motor, and offers the highest level of precision available—enabling duplo and quadro four-color imaging. Now color trade shops and commercial printers requiring high-quality imaging output in an 8-up format can complete more jobs in less time, boosting productivity and achieving a faster return on their imagesetter investment. SelectSet Avantra 44S offers four resolutions (1200, 1800, 2400, and 3600 dpi), full linearity, OptiSpot at all resolutions, and CristalRaster screening. The result? The highest levels of imaging and reproduction quality available.

SelectSet Avantra 44E

An high-value approach to large-format imagesetting

SelectSet Avantra 44E is a large-format imagesetter that fits well within a limited budget, while still providing remarkable performance and value. Customers with large-format applications requiring up to 200 lpi should consider this member of the Avantra 44 family. SelectSet Avantra 44E can image at three resolutions—1200, 1800, and 2400 dpi with OptiSpot optimization at 1200 and 1800 dpi.

SelectSet Avantra 44E is the preferred system for use with Agfa Setprint polyester plate material. Setprint enables the Avantra 44E to output press-ready plate media for a range of applications, including shoppers, checks, newsletters, packaging, and tags and labels.

Choose a SelectSet Avantra 44 today

With three exceptional models to choose from, there's a SelectSet Avantra 44 imagesetter that is right for your business. And as your business grows and your needs change, simple system upgrades make it easy to add new capabilities. When you buy an Agfa imagesetter, you are making a quality investment that will continue to pay off well into the future. And that's just one of the reasons why Agfa has sold more imagesetters than any other manufacturer.

A high-performance, aerodynamic spin motor keeps imaging smooth and accurate—no matter how fast it rotates.

SelectSet Avantra 44 imagesetters can output Alliance film as well as Setprint polyester plate material, enabling them to double as platesetters.

SelectSet Avantra's OptiFocus—a unique, adjustable focus lens—along with OptiSpot—adjusts the spot size to match each resolution.
